## Market launch: new FRN OH

We're pleased to announce the market launch of the FRN OH. It's the new zero pressure regulator which main application focus are on gas engines. This new product substitutes the current FRN and the flanged FRNG OH.

The FRN OH will be available from 2025-04-07. Covers the range of DN 40 up to DN 150, enlarging FRN with 2 additional sizes. Compared to the zero-pressure function of FRNG and FRNG OH it offers a more sensitive behavior and a lower hysteresis value, being a better option for gas trains in engines using atmospheric mixers. The low hysteresis offers a wide and accurate modulating range within the working range.

Nominal size	Designation	Article N°
DN 40	FRN OH 5040	297484
DN 50	FRN OH 5050	297485
DN 65	FRN OH 5065	297486
DN 80	FRN OH 5080	297487
DN 100	FRN OH 5100	297488
DN 125	FRN OH 5125	297489
DN 150	FRN OH 5150	297490

### Replacements kits available

The new construction design of FRN OH, as a difference to the previous FRN, allows the option to have complete replacement kits including membranes. Those are available with the following article numbers:

Designation	Article N°
Repl. kit FRN OH DN 40	303087
Repl. kit FRN OH DN 50	303088
Repl. kit FRN OH DN 65	303090
Repl. kit FRN OH DN 80	303091
Repl. kit FRN OH DN 100	303092
Repl. kit FRN OH DN 125	303093
Repl. kit FRN OH DN 150	303094

## Phase out FRN and FRNG OH

As part of our portfolio optimization strategy, the FRN OH will replace both the FRN and flanged FRNG OH, which will be discontinued on 2025-12-31. The following table shows the items being phased out and their corresponding replacements. To ensure adequate supply before discontinuation, the last order date will be on 2025-09-30.

Phased out articles by 2025-12-31		Replacement articles
